Class V Afternoon Program Independent Project

Returning students in Class V who wish to pursue an interest in a specific area of independent study may apply to the Afternoon Program Certification Committee through the Director of Athletics and Afternoon Program Coordinator. The project can take place during the afternoons of the fall, winter, or spring season. The weekly time commitment must be at least seven hours. Students may select this option only once during the academic year; this option is not available to new Class V students.

The project cannot consist of outside work in an activity or sport that Nobles offers.

In applying, students must secure the permission of their advisor and parents. Either a Nobles faculty member must supervise and mentor the project or the student must arrange for an external teacher, mentor, site director, or coach to supervise the project. The student’s advisor will provide oversight for the School and will chart the student’s progress. The student and his/her family is responsible for any necessary transportation.

A written report or other end-product (as proposed by applicant) is required at the end of the season in which the student undertakes the independent project. This report must be submitted to and approved by the Director of Athletics and Afternoon Program Coordinator.

To be included in proposal (see application form):
• Description of the project
• Weekly Schedule / Calendar of project
• If necessary: Contact information and credentials for the “outside of Nobles” mentor.
• Proposed "Outcome" i.e. what the end-product of the project will be. (written report, presentation to MS assembly, etc.)
